# Top 5 Reasons Protera is Your Oil, Gas, and Energy Solution

95% of businesses in the oil and gas industry are investing in their digital strategy while looking to reduce costs by 15-30%, according to Gartner. Ensure that your organization is designed to take advantage of digital foundations that keep you competitive, agile, and cost optimized. Protera is the leader in running, protecting, and helping you realize the full potential of your SAP and enterprise environments.

**Financial Governance** – With the rapid growth of cloud comes an even more critical focus on real-time control and visibility of cloud spend to avoid budget overruns and resource strain. Protera offers a real time dashboard of cloud costs, as well as continuous monitoring of potential cost reduction and budget reallocation opportunities to focus resources higher up the stack.

**Data Security** – With the increasing deployment of data sensors in drilling and production operations, oil and gas production has become a data-intensive industry, and operators need to ensure that data is both secure and put to the best and most immediate use. Protera's 24/7 security and monitoring services protect every layer of your company and its data to prevent breaches, data loss, and human error.

**Operational Scale** – Set your business up for scalability and let our managed IT services team manage, deploy, and back up your enterprise assets so you can focus on projects up the stack. Our record in the OGE industry shows we know what it takes to scale your operations that take into account the often-harsh conditions and demanding environments where these mission critical IT solutions must perform.

**Automation Experts** – Fully integrated SAP and enterprise technology solutions driven by automation reduce risk and accelerate time to value. Whether a cloud migration, SAP S/4HANA technical upgrade or creating an automated disaster recovery testing solution, Protera's automated approach saves time, cost, and resources.

**Continuous Improvement –** Control cost, measure and manage risk, and create platforms that scale and allow business to grow with continuous improvement embedded in Protera's application and cloud managed services model.
