Top 5 Reasons Protera is Your Microsoft Azure Modernization Partner for Utilities

Gartner analysts recently noted the impact that global economic and environmental challenges have on the ability to provide available, affordable, and acceptable energy and water to communities. Protera is a leader in SAP and managed services for running, protecting, and driving value from your enterprise systems, so you can focus on maximizing the impact of the business for your customers while remaining competitive.

Financial Governance – Optimizing asset performance and utilization while minimizing operations and maintenance costs is a key concern in the utilities industry. Place a critical focus on real-time control and visibility of cloud spend to avoid budget overruns and resource strain with Protera's real-time dashboard of cloud costs, as well as continuous monitoring of potential cost reduction and budget reallocation opportunities to focus resources higher up the stack.

Data Security – Access to advanced analytics will impact the utility value chain, improving business outcomes for assets, commodity, revenue, and customers. Protera's data intelligence and 24/7 security and monitoring unearth insights as well as protect every layer of your company and its data to prevent breaches, data loss, and human error.

Operational Scale – Set your business up for scalability and let our managed IT services team manage, deploy, and back up your enterprise assets so you can focus on projects up the stack. Our holistic approach to operational resilience will modernize your enterprise technology landscape to ensure business resilience, despite extreme weather conditions and demand-supply volatility.

Automation Experts – Fully integrated SAP and enterprise technology solutions driven by automation reduce risk and accelerate time to value. Whether a cloud migration, SAP S/4HANA technical upgrade or creating an automated disaster recovery testing solution, Protera's automated approach saves time, cost, and resources.

Continuous Improvement – Identify opportunities for digital transformation and improve performance by streamlining the updates and integration of operational systems while controlling cost and managing risk. A continuous improvement model is embedded in Protera's application and cloud-managed services model.

Protera Quick Facts

Founded in **1998**

1st to run SAP on public cloud
