Quickly migrate and reliably run SAP applications on Microsoft Azure

Run SAP on Microsoft Azure with efficiency, flexibility, and security

Modern IT professionals are tasked with helping their organization transform operations, save costs, and deliver innovative products and services to customers. Choosing to run SAP on Microsoft Azure is a start. However, without the right expertise in house, you may need help transitioning SAP systems to the cloud without putting business operations at risk.

Take advantage of all Microsoft Azure has to offer with Protera
Protera is a Microsoft Gold Cloud Platform partner certified by SAP in hosting, cloud, application management, global outsourcing, and SAP HANA operations services. For over 20 years, Protera has been helping organizations running SAP achieve their transformation objectives with improved value, increased quality, and reduced risk. From supporting the very first organization running production SAP on cloud, Protera has been helping organizations optimize how their businesses run SAP. With Protera, customers running SAP on Azure have seen 5x business process acceleration, implemented real time customer response, and successfully adopted the latest technologies. Now, with SAP on Azure services powered by Protera Arion®, organizations can shorten their migrations, optimize their cloud landscapes, manage cloud costs and service levels, and use powerful automations to keep their systems up to date.

Why Customers Choose Protera for SAP on Microsoft Azure

Microsoft Partner | Gold Cloud Platform / Gold Datacenter / Gold Data Analytics / Gold Cloud Productivity / Silver Security

Lower Operational Costs

Protera has the expertise and tools to analyze your SAP and related systems, design the most efficient architecture, and help you keep costs under control.

Faster Response to Business Changes

Take advantage of powerful automations that can simplify and streamline daily tasks – like starting, stopping, and patching servers or refreshing environments – to keep your modern SAP operations running smoothly.

Improved Security and Reliability

Protera brings service provider scale to security, with proven policies, technologies, and techniques that have protected customers for over twenty years.

Intelligent SAP on Azure Migration and Management with Protera Arion®

When you choose Protera and the Protera Arion® platform, you'll shorten your migration, reduce your project risk, and run your SAP more efficiently on Azure. From automated risk assessment of your current SAP and non-SAP environments, to optimized architecture and Azure cost prediction, you'll see a more accurate picture of what your future environment on SAP on Azure will look like.

You'll also have access to a single, real time view of SAP and Azure cost, quality, and performance metrics, powerful automations, and 24x7 support from SAP experts with decades of experience.

1 Analyze SAP and non-SAP

2 Generate cloud architecture

3 Predict cloud costs

4 Finalize transformation plan

5 Provision cloud infrastructure

6 Automate transformation

7 Validate SAP and non-SAP

8 Confirm cost, quality, performance

9 Provide final support

Customer success story: Spartech

SPARTECH™

Challenges

St. Louis based plastics innovator and manufacturer, Spartech, faced a six-month window to carve out SAP ECC, BW and non-SAP applications into a separate business unit from a larger chemical company due to a divestiture.

Solution

With the help of Microsoft Gold Cloud Platform partner Protera, the company completed a successful separation project while maintaining business continuity, improving their operations, and preparing for scale, all while significantly reducing costs with SAP on Azure.

Results

2TB
Migrated to Microsoft Azure

6-month
Project timeline for carve out and migration

10-hour
Cutover window

15
Manufacturing facilities integrated and supported
