- SAP Basis Administration
- On-demand, detailed SAP health check and analysis and reporting
- Manage your entire IT, SaaS apps included
- OS and database monitoring and administration
- SAP migrations to Cloud, HANA and S/4HANA

Protera Arion® for Cloud Managed Services

Protera Arion is our proprietary SaaS cloud modernization platform designed specifically for organizations running SAP and enterprise applications on AWS and Microsoft Azure. With Protera Arion you can:

View a consolidated dashboard of operational metrics, including SAP-specific metrics such as dialog response time, across your entire enterprise. Dive in for detail about any system.

View cloud spend in real time, predict your monthly bill, and perform complex analysis by project, department and application in minutes.

Access a library of automations that let you easily provision, monitor, and manage cloud services.

Modernize your SAP and entire enterprise with better visibility and lower cost

Increase visibility: Execute your business projects confidently with complete transparency to key aspects of your SAP + related applications on cloud

Keep cloud costs in line: Manage and predict cloud costs by landscape, system, project or department

Improve application performance: View system responsiveness with metrics that adapt to how your users run SAP

Manage agile development: Provision cloud infrastructure, start and stop systems, automatically refresh systems for testing and more

Keep systems secure and up-to-date: Know when your next system maintenance events are and be sure that proper maintenance is being performed

Monitor intelligently: Improve reaction time and root cause analysis by preventing overreporting and false positives from infrastructure and application monitoring

“ Since 2015, our operating portfolio and our operations have grown six-fold, 600%, and we've only had to double our workforce to accommodate. Running SAP on cloud managed by Protera, we've been able to keep OpEx low, still hit our margins, and really thrive in our industry. ”

Eric Zenner, VP of IT,

In partnership with AWS and Microsoft Azure

Protera is an Advanced tier APN partner with AWS and a Gold Cloud Platform partner with Microsoft. Protera and Protera Arion are SAP certified and SOC 2 compliant. These technical partnerships mean we can offer unique perspectives on how to optimize SAP and your entire enterprise on cloud. We work closely with their product development teams to ensure you are receiving the benefits of their latest innovations. Use your current AWS or Microsoft Azure accounts, or ours.

Modernize SAP and your entire enterprise with Protera Cloud Manage
